Principal’s response to State Government Loans for Independent Schools

Pedare Christian College is very appreciative of being able to apply for the State Government's low interest, long term loans announced today. The State Government’s commitment to Early Learning and STEM are strategic learning goals for the College as outlined in our “Towards 2020” Strategic Plan.

This year Pedare is undertaking a major master planning process with a focus on developing new learning spaces for students. The College is seeking to provide additional facilities that enrich the learning of students for our Pre Reception to Year 2 classes and new learning spaces in our Middle School.

The Middle School’s focus on Robotics, Digital Technology and Food Technology is consistent with the State Government’s initiative in STEM. Our aim is to develop the creative, problem solving and design capabilities of all our students.

Pedare students will need to be highly accomplished, high order thinkers so they can successfully move to tertiary and career pathways beyond Year 12. We know that 75% of the fastest growing industries will need skills in the areas of science, technology, engineering and mathematics.

Mike Millard
College Principal
